

MAAELUMINISTEERIUM

CLLD post-2020 in Estonia

Oleg Epner

Fisheries Development Bureau
Department of Fisheries Economics
Ministry of Rural Affairs of Estonia

CLLD in Estonia

Key figures:

- 8 coastal areas through two periods (EFF and EMFF)
- EFF: 693 operations completed and 21 935 845 € paid out
- EMFF: 512 operations completed and 12 309 691 € paid out

Agriculture and fisheries development plan for the year 2030 – basis for the OP

OVERALL OBJECTIVE:

Estonian food is preferred, the environment and biodiversity are preserved, the food sector businesses are successful and land and coastal communities are viable

SUB-OBJECTIVE:

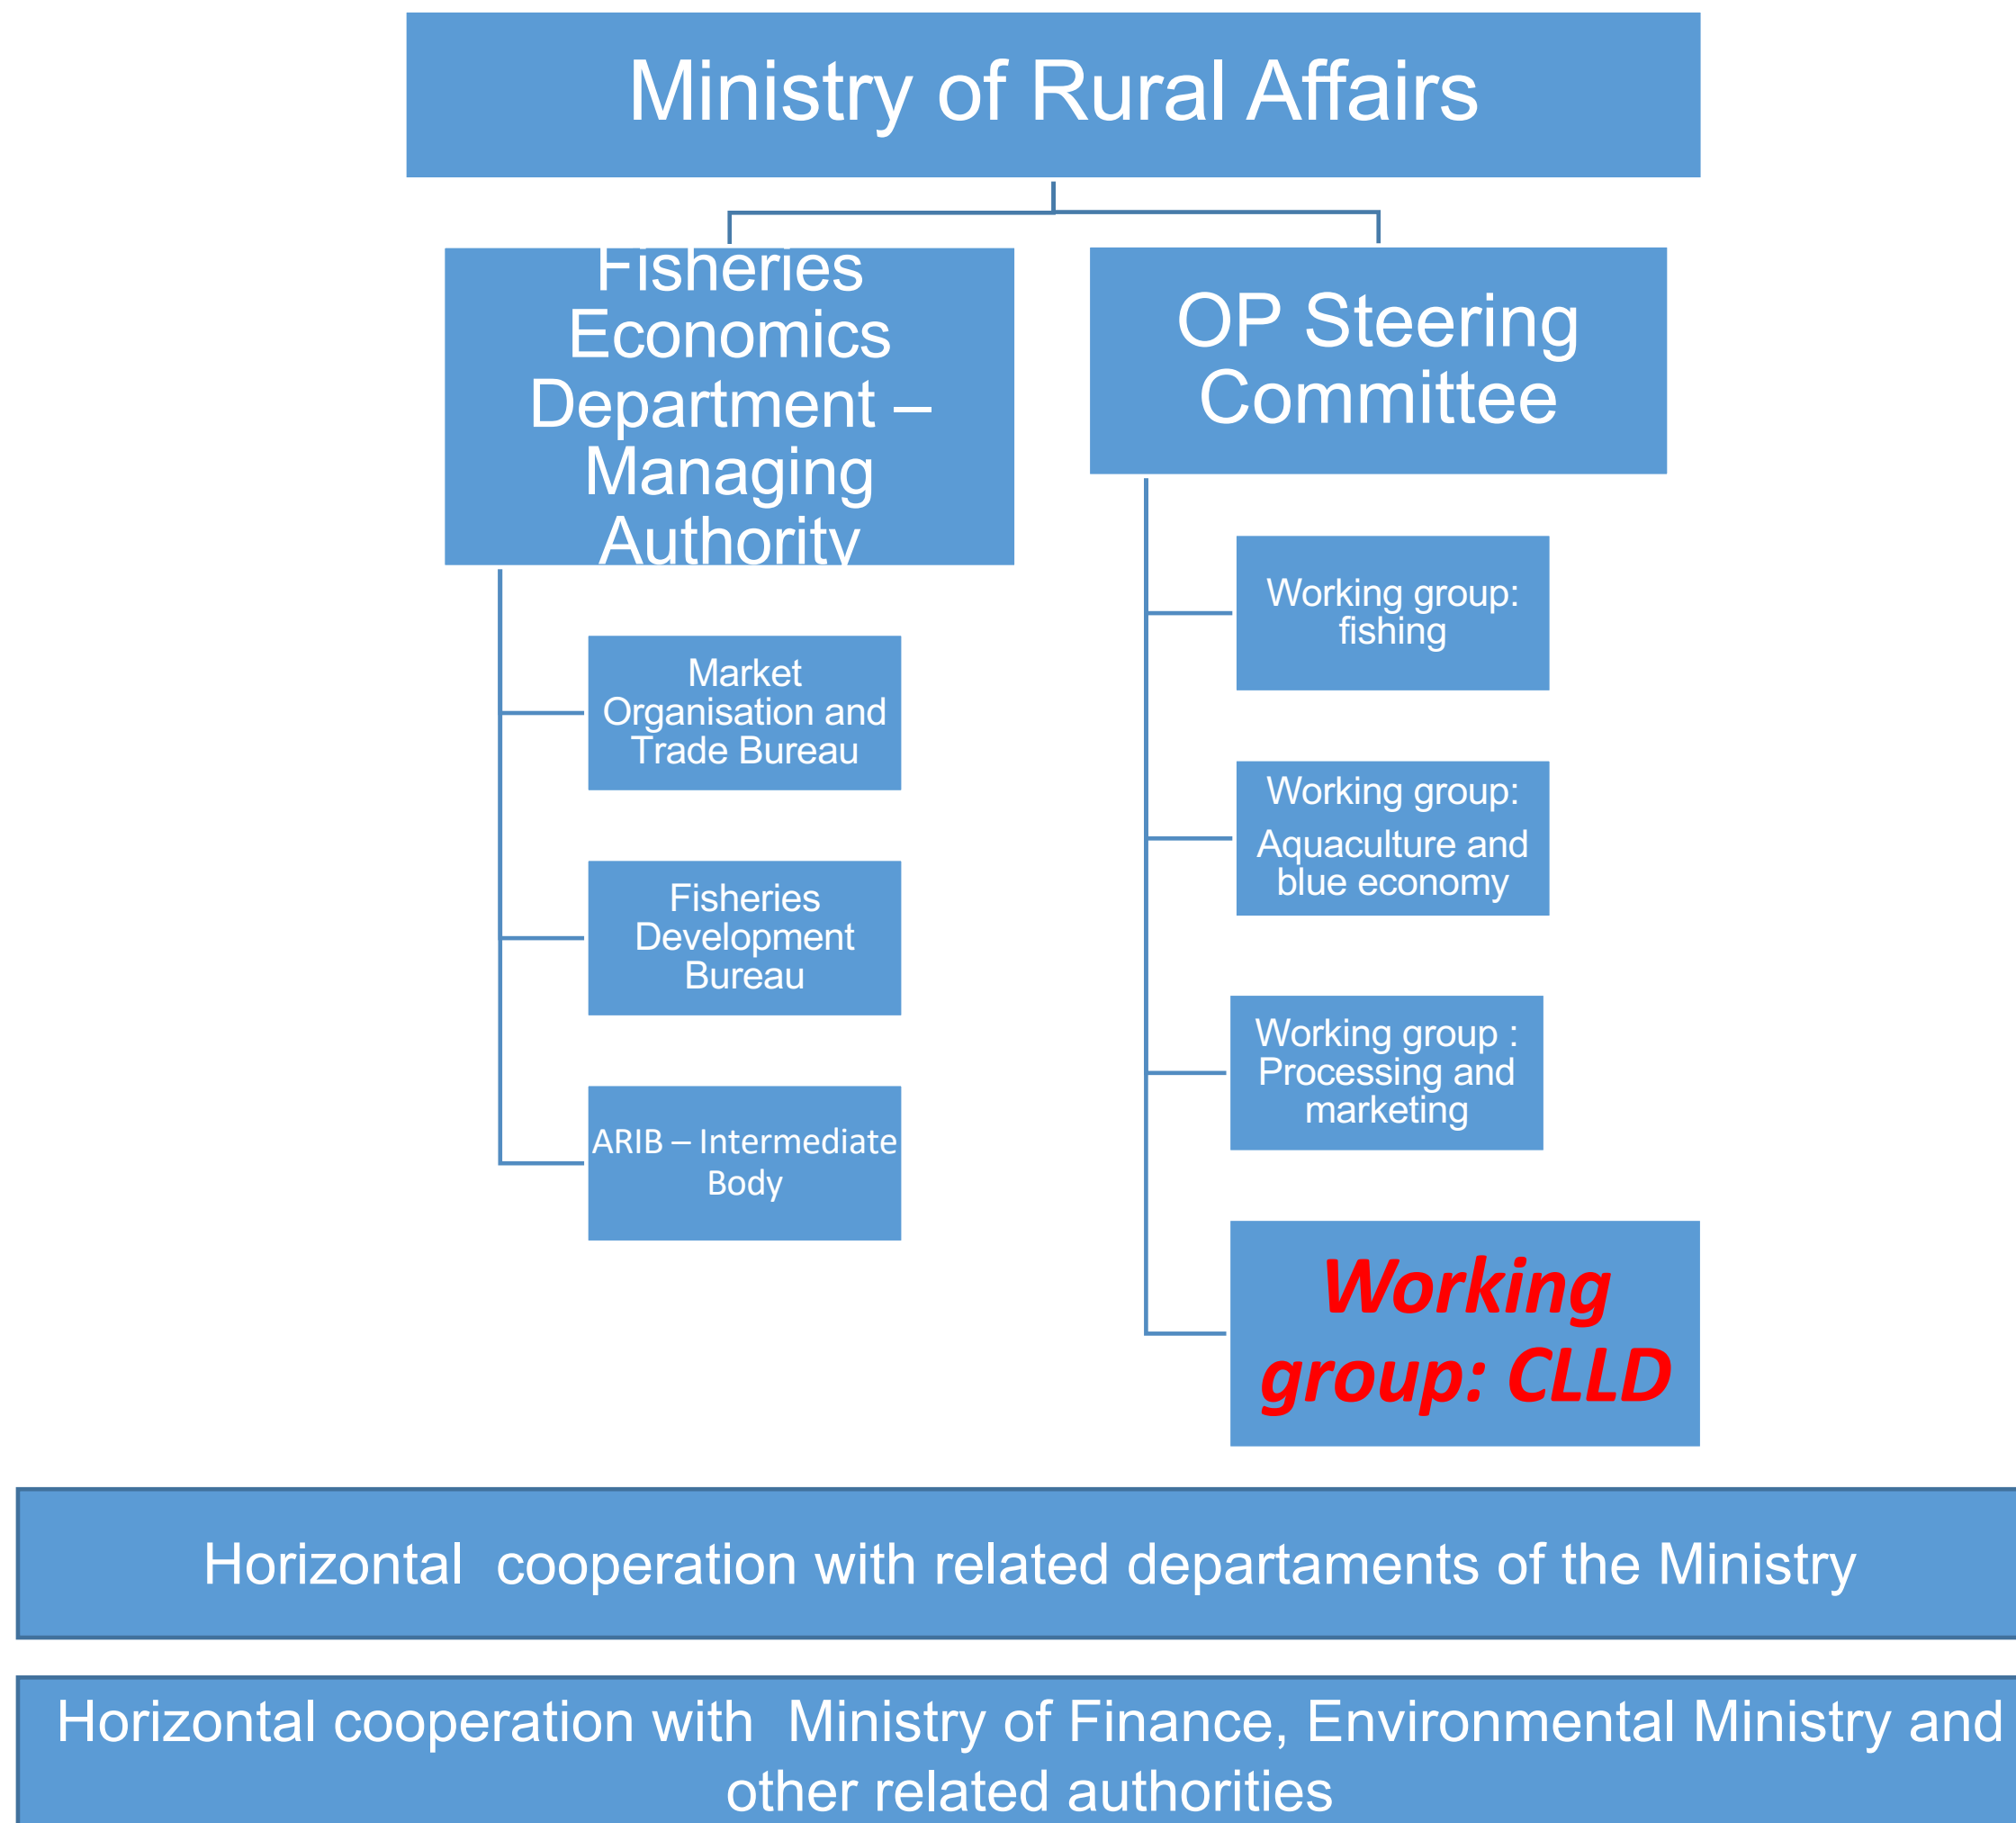

Sustainable fishing that ensures fisheries competitiveness and fish stocks sustainable management

TARGETS FOR 2030:

Fish stocks are managed sustainably and are in good condition.

Fisheries and aquaculture is carried out sustainably and is economically viable.

Management of the programming and involvement of the partners

Involvement of local action groups to the programming

- seminar in July 2019
- frequent round tables, last one in the beginning of November 2019
- involvement of the FLAG's representatives in our sectorial working group meetings, last one held in October 2019
- analysis and consideration of the results of the mid-term evaluation report made in 2019
- site visits – last one in to Läänemaa and Pärnumaa CLLD
- questionnaire sent out in IIQ 2020 regarding fishing ports and landing sites and related developments needs

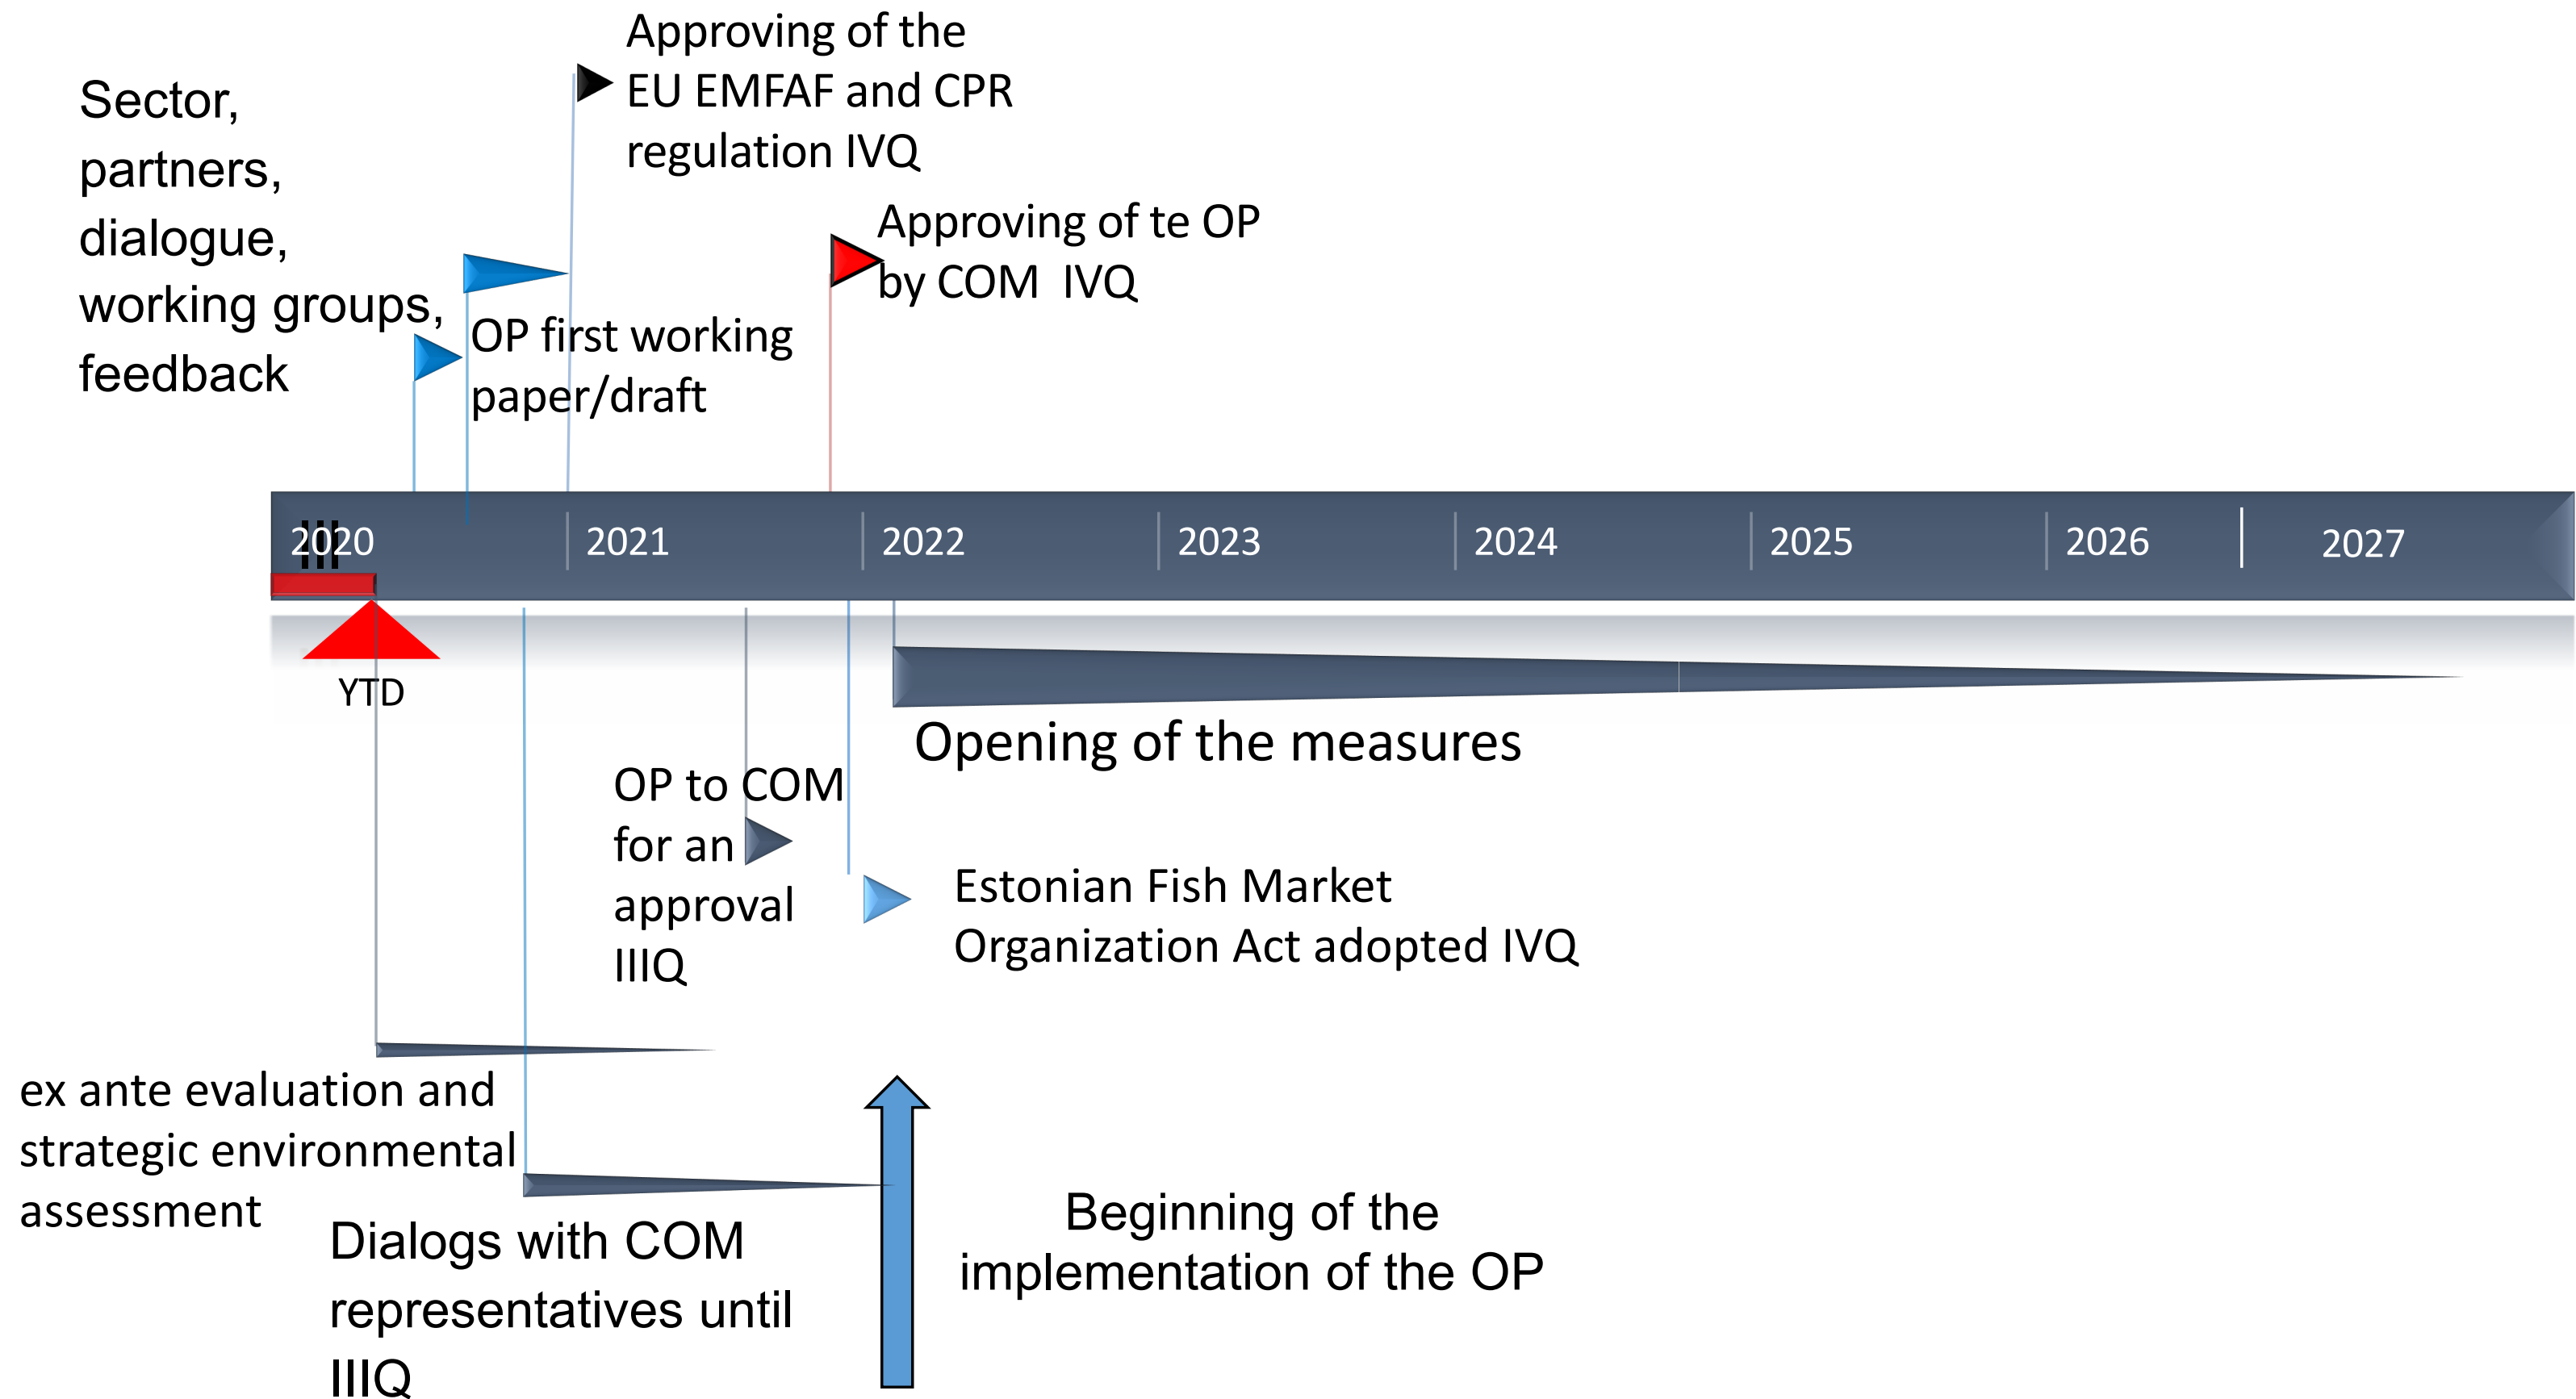

Operations to be supported

- Sustainable fishing activities and selective gears
- Restocking and environmental balance (cormorants, fishermen, seals, pollution, waste)
- CLLD - cultural heritage and local unity between 8
FLAGS
- Added value to fisheries products
- Support of diversification of activities
- Operations to reduce eutrophication and CO2 pollution
- Modernize fishing harbours and development of
multifunctional services

Challenges identified related to the CLLD

- increasing the competence, quality of work and professionalism of evaluation committee members;
- increasing FLAG members awareness;
- improving the FLAG communication;
- decreasing the administrative burden, reducing the scope for interpretation of legal acts, making the procedure more effective and result oriented;
- wider scope for the usage of the SCO-s;
- blue economy activities in fisheries areas;
- internationalization of cooperation activities between MS FLAG's (how to overcome the financing and budget approval of such operations).

EMFAF 2021-2027 preliminary timetable

Priorities 2020 -2021

1. COVID measures – delays in programming

2. Legislation

Agreement on EU level (MFF, EMFAF)
Development of national legislation (Fisheries Market Organization Act, ministerial decrees on measures, including CLLD).

3. OP preparation

- SWOT
- intervention logic
- measures
- greater application of the simplified cost method

Milestone :

by the end of the IIQ 2020 the new round of consultations with partners, including CLLD working groups
